

Mini Project: Portfolio Page for "Editkaro.in"

Objective:

Create an **interactive and dynamic portfolio webpage** for a real-world client, **Editkaro.in**—a social media marketing and video editing agency. You will showcase their work, which includes categories like short-form videos, long-form videos, gaming videos, football edits, eCommerce ads, documentary style, color grading, anime videos, and ads.

Requirements:

- Design a **visually engaging portfolio webpage**.
- Use **HTML, CSS, and JavaScript** to implement interactivity and responsiveness.
- Include **creative elements** like video previews, filters, or animations.
- Organize videos by **categories** with clear navigation. You can add a categories or filter by button or simply display all of them with headings, using your creativity.
- Ensure the webpage is fully **responsive** for mobile and desktop views.

Instructions:

- You can use your **own ideas and creativity** to design the portfolio page. Feel free to add elements like hover effects, video lightboxes, or unique layouts.
- **Best Project Incentive:** The best-designed portfolio page will be shared with the client and featured on **VaultofCodes' website**. The creator will also be **tagged on social media** platforms, giving you public recognition for your work.

Deliverables:

- Submit a **fully functional webpage** with the complete code (HTML, CSS, JavaScript).
- Deployed

-Good luck, and show off your best work!
